EXPERIENCE

Founder & Full-Stack Engineer - Splitify

Jul 2025 - Jun 2026

Founded and operated a production SaaS for shared expenses, payment requests, recurring workflows, and SMS reminders.

- Shipped the live MVP in **under 30 days** and grew it to **hundreds of users** while owning React, Node.js/Express, MongoDB, APIs, infrastructure, and deployments.
- Designed REST APIs and payment workflows with Stripe/Plaid/Telnyx, using webhooks, safe retries, idempotent transaction handling, rate limiting, and authorization safeguards.
- Implemented timezone-aware background jobs plus admin analytics for operational monitoring, cost forecasting, conversion/retention, and production issue diagnosis.

Freelance Full-Stack Engineer - The85ers

Feb 2025 - Jul 2025

Partnered with a professional sports agency to build and ship a production website for the U.S. Women's National Soccer Team.

- Shipped reusable React component architecture, dynamic editorial layouts, Framer Motion interactions, and a performance-focused image pipeline using responsive assets, lazy loading, and modern formats.
- Collaborated with design and creative stakeholders through Figma/Notion and accessibility review.

Full-Stack Engineer - 2351 Labs

Jul 2024 - Feb 2025

Built a white-labeled internal software catalog that helped enterprise teams discover and organize shared services, libraries, tooling, and documentation.

- Delivered an MVP in **under two months** with a small engineering team, partnering with product/design on information architecture, discovery flows, and implementation trade-offs.
- Implemented Node.js/Express APIs, MongoDB/Mongoose data models, OAuth 2.0 (Google/Microsoft), JWT-based RBAC, server-side pagination, advanced filtering, and URL-driven state.

PROJECTS

Full-Stack Engineer - RustRivals

2026

Rival tracker for Rust. A team subscribes, follows specific players, and gets a live feed plus Discord and in-game alerts when their stats move.

- Shipped a multi-tenant **Java 21 / Spring Boot** API and **React** dashboard with auth, plan limits, and **Stripe** checkout.
- Built the poll-and-diff loop that publishes one event to the live feed, **Discord**, and **Rust+**, deployed on **AWS EC2** and Netlify.

Founder & Full-Stack Engineer - FixMyOldWebsite

2026

Built an AI SaaS platform for business lead discovery, automated website generation, technical auditing, and outreach.

- Generated and deployed **5,000+** production websites and discovered **tens of thousands of leads** through a Next.js/Node.js/MongoDB automation platform integrating AI, browser automation, and third-party APIs.
- Designed backend job execution with **50+ parallel workers** and atomic MongoDB claiming, processing **thousands of audits/day** with zero duplicate execution.
- Optimized MongoDB schemas and indexes for **hundreds of thousands of lead records**, maintaining **sub-200 ms** filtered and geospatial queries.
- Implemented tenant isolation, ownership validation, rate limiting, crash-safe resume, and automated SSL/custom-domain workflows for production reliability.
